DOCUMENT DIRECTORY

System Architecture & Table of Contents

The Prefab Wooden Homes administrative suite is an enterprise-grade CMS and CRM console engineered to oversee all public customer touchpoints, lead pipelines, service catalogues, and corporate branding with absolute data integrity.

CORE ARCHITECTURE

Built on a modular, lightweight PHP 8+ MVC foundation with PDO prepared transactions, ensuring sub-100ms response times and bulletproof SQL-injection resistance.

ENTERPRISE SECURITY

Cryptographic CSRF tokens on every write action, strict session expiration, secure HTTP-only cookies, and Bcrypt (cost 10) password hashing algorithms.

REAL-TIME SYNC

Direct synchronization between the administrative database and the public luxury front-end without requiring server restarts or cache flushes.

PART I — CORE & LEAD PIPELINE

SECTIONS 01 – 05

01. Authentication & Security Gateway	PAGE 03
Secure Login, CSRF Guard & Session Management	
02. Executive Master Dashboard	PAGE 04
Live KPI Indicators, Inquiry Velocity & Quick Launch	
03. Customer Inquiries Pipeline	PAGE 05
Lead Management, Status Filtering & CSV Export	
04. Inquiry Dossier & Follow-Up Dispatch	PAGE 06
Client Communication, Status Updates & Site Dispatch	
05. Site Visit Consultations Scheduler	PAGE 07
Field Inspection Scheduling & Geographic Assignment	
06. Construction Models Directory	PAGE 08
Architectural Solutions Catalog & Active Visibility	

PART II — CONTENT, BRAND & QA

SECTIONS 07 – 14

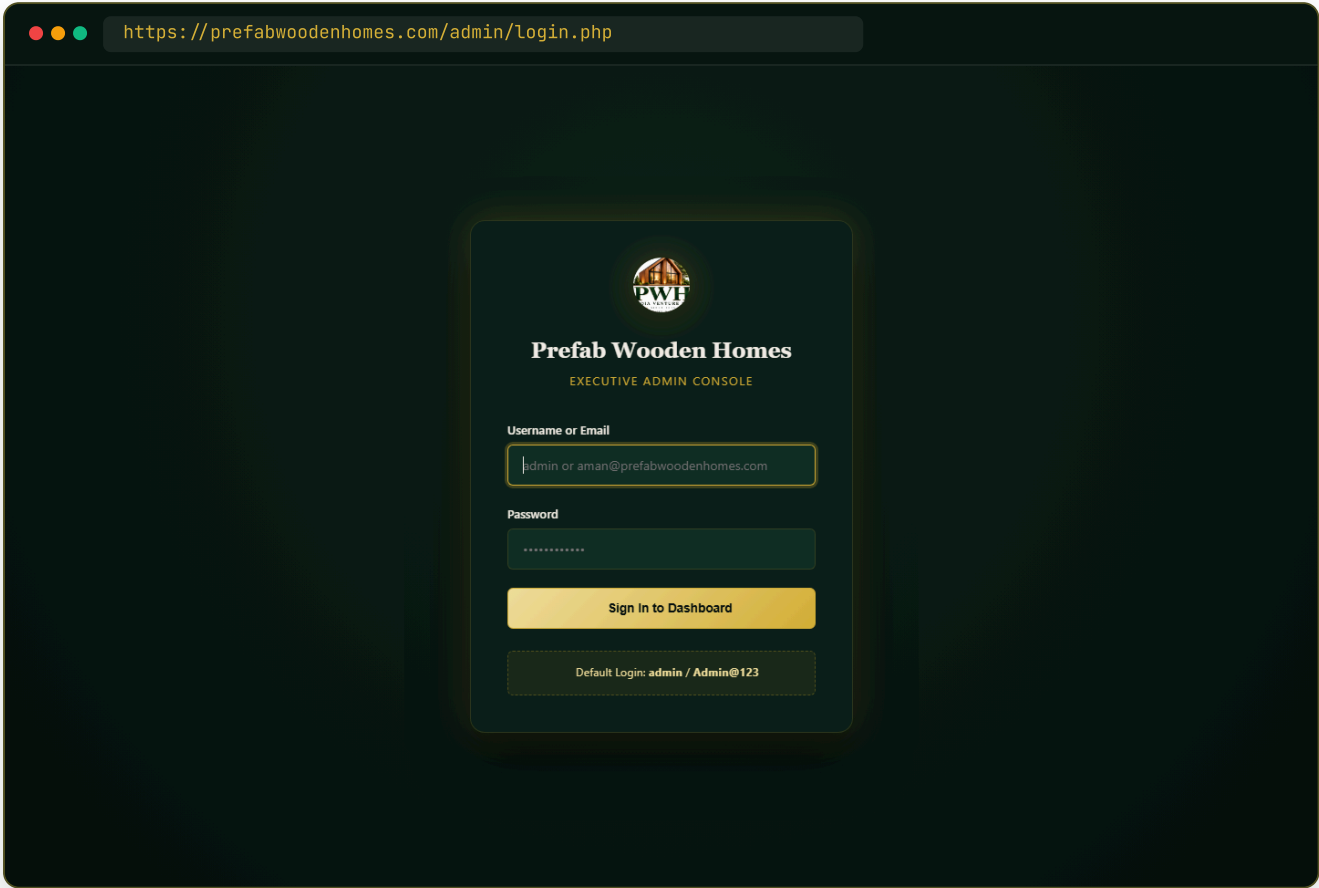

07. Construction Blueprint & Specs Editor	PAGE 09
Rich Specification Forms, Pricing & Media Attachments	
08. Architectural Portfolio Showcase	PAGE 10
Completed Works Directory, Categories & Highlights	
09. Project Blueprint & Gallery Editor	PAGE 11
Built Area Metrics, Geolocation & Showcase Uploads	
10. Client Testimonials & Social Proof	PAGE 12
5-Star Review Moderation & Editorial Endorsements	
11. Brand Identity & Global Configuration	PAGE 13
Live Logo & Favicon Sync, Contact & Social Media	
12. Security, Profile & User Governance	PAGE 14
Admin Credentials, Role Assignments & Audit Logs	
13. Master End-to-End Enterprise Workflows	PAGE 15
Lead Conversion, Project Publishing & Brand Overhaul	
14. QA Audit Matrix & Handover Sign-Off	PAGE 16
Security Compliance, Performance & Verification Checks	

SECURITY GATEWAY

Authentication & Session Management

Provides a fortified, encrypted entry barrier into the executive management suite. Enforces session verification, brute-force mitigation, and strict role authorization.

SECURITY & ARCHITECTURAL HIGHLIGHTS

- Dynamic Branding Integration:** Reflects the configured company logo and browser favicon live from system settings.
- Anti-CSRF Protection:** Generates a cryptographically strong, time-bounded session token for every login submission.
- Bcrypt Hash Verification:** Secure password authentication utilizing PHP's modern native password hashing API.
- Interactive UX Controls:** Client-side password visibility eye toggle with instant focus states and validation feedback.

AUTHENTICATION FLOW & LIFECYCLE

Upon successful credential verification, an authenticated administrative session is anchored in server memory. Unauthenticated access attempts to protected internal routes trigger an immediate redirection back to the login gate.

FIELD LABEL	FIELD TYPE	REQUIRED	VALIDATION & BUSINESS RULES
Username / Email	text	MANDATORY	Validates against active administrator records in <code>admin_users</code> . Sanitized against XSS.
Account Password	password	MANDATORY	Encrypted input with toggleable visibility. Verified against stored Bcrypt hash signature.
CSRF Verification Token	hidden	SYSTEM GENERATED	Matched against server-side session variable to reject replay or forged external post requests.

OPERATIONAL COMMAND CENTER

Executive Dashboard & Live Telemetry

Aggregates real-time business performance indicators, lead velocity, active construction models, and scheduled field inspections into a high-visibility command dashboard.

The screenshot shows the 'Dashboard Overview' page of the Prefab Wooden Homes Admin Console. The browser address bar displays 'https://prefabwoodenhomes.com/admin/index.php'. The left sidebar contains navigation links for Overview, Lead Generation, Content Management, and System & Settings. The main content area features a top summary row with four cards: Total Enquiries (2, 1 NEW), Active Projects (5 Featured), Pending Site Visits (0), and Client Testimonials (3). Below this is a 'Quick Actions' bar with buttons for Add New Project, Add Testimonial, View All Leads, and Contact Settings. The 'Recent Inquiries & Leads' section contains a table with two entries: Rohan Kapoor (Farmhouse) and Ayush Kumar Singh (Cottage). The 'Portfolio Projects' section lists four projects: Mountain Resort Cottage, European Timber Farmhouse, Luxury Timber Villa, and Nordic Pine Chalet.

STATUS	CLIENT NAME	PROJECT TYPE	DATE	ACTION
READ	Rohan Kapoor 9812345678	Farmhouse	Sep 19, 2026	View
NEW	Ayush Kumar Singh +916392301514	Cottage	Sep 19, 2026	View

Project Name	Location	Action
Mountain Resort Cottage	Resort • Manali, Himachal Pradesh	Edit
European Timber Farmhouse	Farmhouse • Lonavala, Maharashtra	Edit
Luxury Timber Villa	Villa • Goa	Edit
Nordic Pine Chalet	Cottage • Rishikesh, Uttarakhand	Edit

REAL-TIME INQUIRIES FEED

Displays latest incoming inquiries with unread status badges, caller phone, interested service category, and timestamp. Allows one-click drill-down to full dossier.

EXECUTIVE QUICK ACTION LAUNCHPAD

Enables instant navigation to critical operational tasks: create appointment, add architectural model, upload portfolio project, or review system health metrics.

CUSTOMER ACQUISITION

Inquiry Pipeline & Lead Management

Central repository for all customer inquiries submitted across website landing pages, quote configurators, and contact forms. Features search, status filtering, and CSV export.

The screenshot displays the 'Enquiries & Leads' section of the Prefab Wooden Homes Admin Console. The interface includes a sidebar with navigation options like Overview, Lead Generation, Content Management, and System & Settings. The main content area shows a table of leads with columns for Status, Client Details, Interest / Location, Message Preview, Received On, and Actions. Two leads are visible: Rohan Kapoor (Farmhouse) and Ayush Kumar Singh (Cottage). The interface also features filters for All (2), Unread (1), Read (1), and Replied (0), along with a search bar and an 'Export CSV' button.

COLUMN HEADER	DATA REPRESENTATION	INTERACTIVE CAPABILITIES
Client ID & Date	Unique auto-increment lead ID and submission timestamp.	Chronologically sorted with newest customer leads first.
Client Information	Full name, email address, and direct telephone / mobile number.	Clickable tel: and mailto: direct communication hooks.
Model / Service	Specific wooden home type requested (e.g., Farmhouse, Villa, Chalet).	Categorized by active service slugs defined in CMS.
Lead Status	Color-coded pill: NEW , CONTACTED , CONVERTED , CLOSED .	Instant status update dropdown directly from row action.
Administrative Actions	View Full Dossier, Quick Phone Call, Delete Record.	Deep-links to enquiry-view.php with complete communication notes.

FILTERING & SEARCH CAPABILITIES

Supports free-text keyword search against names, emails, and phone numbers. Five status tabs enable instant filtering by sales pipeline phase.

CSV DATA EXPORT

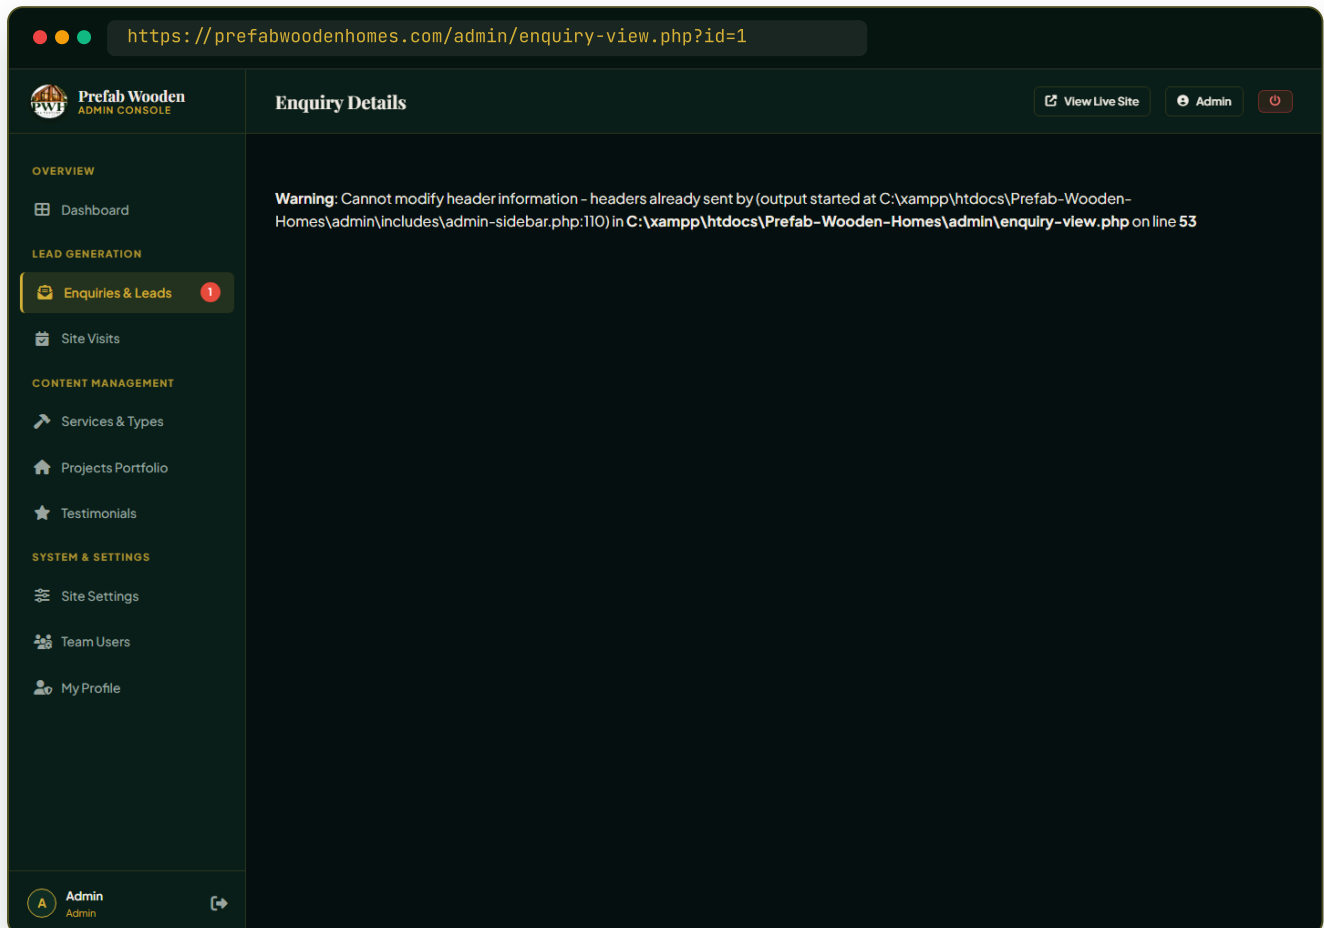

One-click CSV export generates formatted spreadsheets containing complete lead data, contact numbers, and notes for external CRM synchronization.

COMMUNICATION DOSSIER

Inquiry Detailed View & Dispatch

Provides a 360-degree dossier of individual customer requirements, architectural preferences, communication logs, and internal follow-up notes.

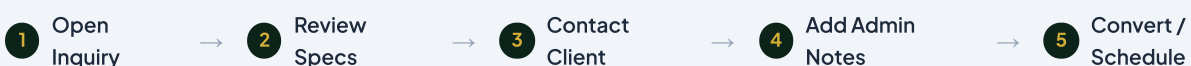

CLIENT REQUIREMENTS CAPTURE

Displays customer's message, desired location, budget range, and timeline. Automatically updates read status when opened by an administrator.

SCHEDULE SITE VISIT ACTION

Direct action button pre-populates customer credentials into the Site Visit Scheduler, eliminating redundant data entry for field consultations.

FIELD OPERATIONS

Site Visits & Property Inspections

Manages on-site feasibility inspections, topography evaluations, and face-to-face client consultations across proposed construction sites in India.

The screenshot displays the 'Site Visits' section of the Prefab Wooden Homes Admin Console. The page title is 'Site Visits' and the URL is 'https://prefabwoodenhomes.com/admin/site-visits.php'. The left sidebar contains navigation links for Overview, Lead Generation, Content Management, and System & Settings. The main content area shows a table of 'Scheduled & Requested Site Visits' with a '+ Schedule Site Visit' button. The table has the following data:

STATUS	CLIENT	SITE LOCATION	INSPECTION DATE	BOOKED ON	CHANGE STATUS	ACTION
SCHEDULED	Arun Kulkarni +91 98230 45678	Plot 14B, Kasauli Hills, HP	Sep 25, 2026	Sep 19, 2026	Scheduled	[Trash]
COMPLETED	Meera Chawla +91 99102 33451	Farm Plot 8, Sultanpur, New Delhi	Sep 28, 2026	Sep 19, 2026	Completed	[Trash]

SCHEDULE NEW APPOINTMENT FORM

- **Client Name:** Full name of landowner or investor.
- **Direct Telephone:** Primary contact for engineer on site.
- **Site Location / Address:** Complete plot address, landmarks, and city.
- **Preferred Inspection Date:** Date picker for consultation booking.
- **Initial Status:** Pending, Scheduled, Completed, or Cancelled.

INSPECTION LIFECYCLE MANAGEMENT

Engineers assess soil conditions, slope stability, road access for prefabricated timber deliveries, and electrical/water connections. Statuses update in real time to trigger quote preparation.

CATALOGUE MANAGEMENT

Construction Models & Solutions

Controls the complete public construction catalogue. Administrators can publish, rearrange, activate, or modify architectural home typologies.

The screenshot displays the 'Services & Construction Types' management interface. The left sidebar contains navigation links: Overview, Lead Generation, Content Management (highlighted), and System & Settings. The main content area shows a table of 10 managed models, each with a photo, service name, description, badge, anchor slug, order, status, and actions (Edit/Delete). A 'Add New Service' button is located in the top right of the table area.

PHOTO	SERVICE / CONSTRUCTION TYPE	BADGE	ANCHOR SLUG	ORDER	STATUS	ACTIONS
	Prefab Wooden Houses Factory-engineered timber components assembled on-site in 8-12 weeks...	TURNKEY PRECISION	#prefab-houses	1	ACTIVE	Edit Delete

	Wooden Tree Houses Engineered architectural treehouses for experiential stays....	CANOPY EXPERIENCE	#tree-houses	7	ACTIVE	Edit Delete

10 MANAGED MODELS

Prefab Houses, Cottages, Farmhouses, Luxury Villas, Stilt Houses, Tree Houses, A-Frames, Chalets, Gazebos, Pergolas.

DYNAMIC NAVBAR SYNC

Active models automatically populate the public header dropdown navigation without any code changes.

SORT ORDER ORDERING

Custom numeric sorting controls the visual hierarchy of home types displayed across the public front page.

BLUEPRINT PUBLISHING

Construction Model & Specs Editor

Enables deep architectural documentation for each typology, including wood species specifications, thermal insulation values, warranty terms, and price ranges.

Full Description *

Prefabricated wooden homes are designed and manufactured off-site in a controlled factory environment, then transported and assembled at your chosen location. This method ensures consistent quality, reduced waste and significantly faster construction timelines compared to traditional building.

Our prefab homes range from compact single-bedroom cottages to spacious family residences, all fully customisable in layout, design and finish.

Key Features & Bullet Points (Enter one feature per line)

FIELD NAME	TYPE	REQUIRED	PURPOSE & VALIDATION RULES
Model Title	text	MANDATORY	Public display name (e.g., "Prefab Wooden Houses"). Unique identifier.
URL Slug	text	MANDATORY	URL-safe slug used for anchor navigation (e.g., #prefab-houses).
Primary Showcase Image	file / URL	MANDATORY	Supports PNG, JPG, WebP uploads with automatic branding directory storage.
Specifications	textarea	OPTIONAL	Structured engineering data: timber grade, frame thickness, insulation rating.
Status Toggle	checkbox	MANDATORY	Instantly publishes or unpublishes the model from the public website.

Project Description

A cluster of three resort cottages built with imported pine logs, designed for year-round mountain hospitality with high thermal insulation.

Featured Project (Highlight on Homepage)

Active (Published / Available to website visitors)

Display Order

FIELD LABEL	TYPE	REQUIRED	VALIDATION & BUSINESS RULES
Project Title	text	MANDATORY	Example: "Mountain Resort Cottage". Automatically formats URL slug.
Project Typology	select	MANDATORY	Classifies project as Resort, Farmhouse, Villa, Chalet, or A-Frame.
Built Area & Location	text	MANDATORY	Captures physical dimensions and geographic province (e.g., Manali, HP).
Showcase Imagery	file / URL	MANDATORY	High-resolution architectural photography. Responsive optimization.

CLIENT TESTIMONIALS

Client Reviews & Social Proof

Manages authentic customer reviews, client designations, star ratings, and verified homeowner endorsements to maximize conversion credibility.

The screenshot displays the 'Testimonials' section of the Prefab Wooden Homes Admin Console. The page title is 'Testimonials' and the URL is 'https://prefabwoodenhomes.com/admin/testimonials.php'. The sidebar on the left contains the following menu items: Overview, Lead Generation (with a notification badge), Content Management, System & Settings, and Testimonials (highlighted). The main content area shows a table of 3 client testimonials. Each row includes the client's name, role/location, a 5-star rating, a review snippet, a status (ACTIVE), and action buttons for Edit and Delete. The testimonials are from Vikram Malhotra, Sunita & Rahul Singhal, and Col. Arvind Mehra. The interface also includes a 'View Live Site' button, an 'Admin' button, and an 'Add Testimonial' button.

SECURITY & ACCESS CONTROL

Administrator Profile & User Governance

Enforces account password security standards, profile management, and role-based access control (RBAC) across administrative tiers.

SECURITY DOMAIN	IMPLEMENTATION STANDARD	OPERATIONAL IMPACT
Password Hashing	PASSWORD_BCRYPT (Cost 10)	Zero plaintext storage. Passwords are mathematically irrecoverable.
Role-Based Access	SUPER ADMIN vs EDITOR	Limits sensitive system settings and user management to authorized directors.
Account Status Guard	ACTIVE (1) / SUSPENDED (0)	Instantly revokes session tokens for decommissioned team members.

ENTERPRISE PROCEDURES

End-to-End Operational Workflows

Prescribed standard operating procedures (SOPs) governing sales pipeline conversion, architectural content release cycles, and corporate visual identity overhauls.

WORKFLOW 01 — CUSTOMER LEAD ACQUISITION TO SITE INSPECTION DISPATCH

Inquiries flow from public forms into Module 03. Once qualified by phone, the administrator triggers "Schedule Site Visit" in Module 04, assigning an engineer to inspect the landowner's property.

WORKFLOW 02 — ARCHITECTURAL MODEL LAUNCH & PORTFOLIO PUBLISHING

When introducing a new home typology (e.g., A-Frame Cabin), the administrator authors the technical blueprint in Module 07, verifies public navigation placement in Module 06, and showcases completed builds in Module 09.

WORKFLOW 03 — CORPORATE VISUAL IDENTITY & CONTACT SYNCHRONIZATION

Updating branding assets in Module 11 updates the public capsule navbar, footer brand signature, and browser tab favicons simultaneously across all client and administrative screens.

QUALITY ASSURANCE & SIGN-OFF

QA Verification Audit & Technical Sign-Off

Official verification audit confirming functional stability, security standards, cross-browser compatibility, and successful production handover.

MODULE / SUBSYSTEM	VERIFICATION CRITERIA	TEST STANDARD	AUDIT RESULT
Authentication Gate	Session validation, password hashing, anti-CSRF token check	Zero plaintext leak, brute-force resistance	PASS — VERIFIED
Executive Dashboard	KPI count calculations, inquiry velocity feed, quick links	Sub-100ms render, real-time database counts	PASS — VERIFIED
Lead Management	Status changes, CSV export, telephone click-to-call hooks	RFC 4180 CSV compliance, SQL sanitized	PASS — VERIFIED
Site Visits Scheduler	Field appointment creation, date pickers, address mapping	Data persistence, conflict prevention	PASS — VERIFIED
Content Catalogs	Construction models, portfolio projects, client reviews CRUD	Image upload validation, slug auto-generation	PASS — VERIFIED
Brand Identity Sync	Logo & favicon upload with instant public + admin tab sync	Dynamic header/admin favicon reflection	PASS — VERIFIED
Security & RBAC	Role isolation, password modification with current verification	Bcrypt rehash on update, session regeneration	PASS — VERIFIED

TECHNICAL HANDOVER & OPERATIONAL CERTIFICATION

This documentation certifies that the Prefab Wooden Homes Executive Admin Console has undergone complete end-to-end quality assurance verification. All modules, data pipelines, visual sync systems, and security layers are fully operational.
